Volume contents

Vol. 18, No. 1, August 1991

Editorial

Age-associated involution: Significance of a physiologic process
H.-J. Schuurman, L. Nagelkerken, R. A. De Weger & J. Rozing 1

Hypothesis: Involution of the thymus with aging–programmed and beneficial
M. Aronson 7

Murine $CD4^-CD8^-$ thymocytes are stimulated by interleukin-2 to proliferate *in vitro* in chemically defined medium
G. W. Wood & J. H. Greenwood 15

The monoclonal HBA-71 antibody modulates proliferation of thymocytes and Ewing's sarcoma cells by interfering with the action of insulin-like growth factor I
G. Hamilton, R. Mallinger, S. Hofbauer & M. Havel 33

Binding and internalization of gold-labeled insulin complex by thymic cells
T. Marinova 43

Influence of growth hormone-releasing hormone (GHRH) on phytoemoagglutinin-induced lymphocyte activation: Comparison of two synthetic forms
A. Valtorta, A. Moretta, R. Maccario, M. Bozzola & F. Severi 51

Letters to the Editor

Thymus biopsy in patients with AIDS and ARC
V. D'Andrea & V. Ambrogi 61

Characterisation of two different subpopulations of axial organ cells of *Asterias rubens* by the use of lectins
M. Leclerc, M. Bajelan & M. Fasseu 63

Vol. 18, No. 2, September 1991

Age-dependent changes in the proportion of macrophages in primary thymus non-lymphoid cell cultures
K. H. Jones, E. J. Stutz & L. P. Sirinek 67

Localization of sex steroid receptor cells, with special reference to thymulin (FTS)-producing cells in female rat thymus
I. Kawashima, K. Sakabe, K. Seiki, H. Fujii-Hanamoto, A. Akatsuka & H. Tsukamoto 79

Thymic atrophy in type 2 reovirus infected mice: immunosuppression and

effects of thymic hormone
T. Onodera, T. Taniguchi, T. Tsuda, K. Yoshihara, S. Shimizu, M. Sato, A. Awaya & T. Hayashi 95

Influence of LTB4 on DC4$^-$, CD8$^-$ Thymocytes. Evidence that LTB4 plus IL-2 generate CD8$^+$ suppressor thymocytes involved in tolerance to self
N. Gualde, F. Cogny van Weydevelt, F. Buffière, M.-O. Jauberteau, R. Daculsi & D. Vaillier 111

Letter to the Editor

High level of CD1a putative peripheral blood precursors of epidermal Langerhans cells after bone marrow transplantation
A. de Fraissinette, C. Dezutter-Dambuyant, D. Guyotat & D. Schmitt 129

Instructions to Authors 133

Vol. 18, No. 3, November 1991

Long-term immunologic tolerance induction in chimeric mice after bone marrow transplantation across major histocompatibility barriers: Persistent or redeveloping immunologic responsiveness after prolonged survival
K. Sugiura, R. Yasumizu, H. Iwai, M. M. Inaba, J. Toki, M. Ogura, I. Hara, R. A. Good & S. Ikehara 137

Establishment of epithelial cell lines from human and mouse thymus immortalized by the 12S adenoviral E1a gene product
T. Hibi, T. Fujisawa, T. Kanai, A. Akatsuka, S. Habu, H. Handa & M. Tsuchiya 155

Use of monoclonal antibodies to identify thymopoietin in cultured human thymic epithelial cells
M. A. Talle, M. J. Brown, C. M. Blynn, T. K. Audhya & G. Goldstein 169

Changes of thymocyte subpopulations induced by activities diffusing from leukemia L1210 cells
J. Kawiak, M. Kawalec, G. Hoser, B. Miks, T. Skórski, Z. Pojda & H. Skurzak 185

Announcement 193

Vol. 18, No. 4, December 1991

The effect of heating on the expression and function of CD-2 molecules on human T-lymphocytes
R. Rabinowitz, O. Afik & M. Schlesinger 195

Modulation of B cell maturation and migration to the thymus of SJL mice. *B cell migration to the thymus*
M. Hart & I. Zan-Bar 209

Thymocyte development in an *in vitro* constructed chimera of radiated fetal thymus and lymphohemopoietic cells
M. Fridkis-Hareli, A. Sharp, L. Abel & A. Globerson 225

Effect of age on the proportion of mouse bone marrow cells migrating in response to newborn thymus supernatant. *Cell migration and thymus evolution in mice*
M. L. Pérez-Mera, D. G. Carnero & M. Rey-Méndez 237

Primary culture of rat thymic non-lymphoid cells: Influence of culture time on the expression of macrophage differentiation antigens defined by monoclonal antibodies
M. Čolić, L. Popović, S. Gašić, D. Drabek & A. Dujić 243
